Election/Restrictions

1. Applicant's election of Species IV, figure 7 in the reply filed on 5/17/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 9-36, 39-66, and 68 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/17/04.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-8, 37, 38, 67, and 69 are rejected under 35 U.S.C. 103(a) as obvious over Haimerl (5285546) in view of either Nowicki (5939488) or Muller (5019638).

Haimerl '546 shows a shoe and inherent/obvious process of making said shoe comprising an upper having an outer material (12a) and a functional layer (16) which is not covered by the outsole (clearly shown in figure 1, element 12a does not cover the bottom portion of element 16 and figures 2 and 4 show additional species which have a bottom edge portion of a functional layer (116, 316) which is not covered by the outer material (112a or 312a), an outsole (14), and an adhesive zone comprising a hot melt

Art Unit: 3728

adhesive/sealing substance (24 and/or 25) and the outsole is cemented to the upper (at 26) substantially as claimed except for the exact hot melt adhesive/sealing substance.

Official notice is taken that reactive hot melt polyurethane adhesives are well known as adhesives which are also sealing agents. Either Nowicki or Muller provides evidence of the official notice and clearly state that the use of reactive hot melt adhesives are well known in the art of footwear, see Nowicki column 6 lines 53-67 and Muller column 3 lines 31-60. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use any known polyurethane based adhesive/sealing agent including reactive hot melt adhesive as clearly taught by either Nowicki or Muller, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

In reference to claim 7, see figure 7 of Haimerl. In reference to claim 8, see figure 1.

Response to Arguments

5. Applicant's arguments filed 8/15/06 have been fully considered but they are not persuasive.

In response to applicants' argument that Haimerl does not show a functional layer with an end region having an edge region which is not covered by the outer material.

Haimerl clearly shows an upper having an outer material (12a) and a functional layer (16) which is not covered by the outsole (clearly shown in figure 1, element 12a does not cover the bottom portion of element 16 and figures 2 and 4 show additional species

Art Unit: 3728

which have a bottom edge portion of a functional layer (116, 316) which is not covered by the outer material (112a or 312a) .

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
